

SupplyPort™

Behind every ManageAL™ product is

web-enabled intelligence.

- *Track Inventory Levels, Usage & Costs Real-Time*
- *Access the System Via Any Web-Enabled Device*
- *Generate Detailed Consumption & Inventory Reports*
- *Configure SupplyAgent from Your Desktop*
- *Browse Inventory Information or Search for Items from Your Desktop*

SupplyPort™ is an innovative portal, customized to your requirements with an intelligent interface that provides employees and vendors vital information throughout the entire inventory management process.

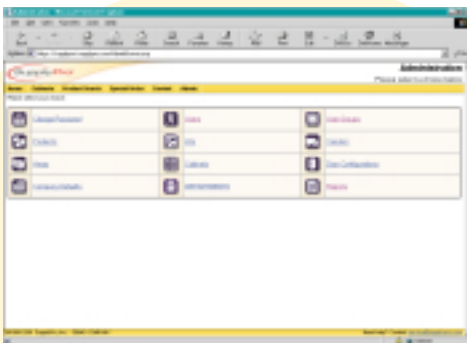

SupplyPort integrates seamlessly with our point-of-use dispensing systems, allowing information to be viewed via any web-enabled device (cell phone, PC or PDA).

Our exclusive software delivers point-of-use information that keeps your inventory processes continually on track.

Authorized users have the ability to view real-time data on a variety of usage and inventory reports, reconfigure point-of-use devices, and place special orders right from their desktops. All of which infuses your entire supply chain process with greater productivity.

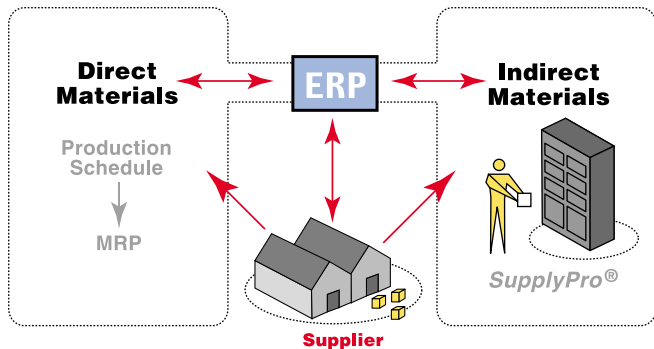

SupplyPort provides innovative features like “Dynamic Par Leveling™” (Patent Pending), which analyzes usage patterns, instantly adjusting for them accordingly, resulting in more efficient re-ordering.

Let SupplyPort open the door to a better bottom line.

Integration with

your enterprise system.

Our experts will work closely with you to assure flawless integration, whether your enterprise system is based on Oracle, Ariba or another ERP system. Tracking indirect supply costs at the point-of-use and feeding the data into your ERP System, closes the loop in inventory management.

How does our system work with yours?

When inventory levels reach a minimum, SupplyPort generates an order, based on your business rules, orders can be processed in three ways:

- Directly to a specific supplier via EDI, fax or XML
- Through your existing ERP system (through a requisition)
- Through order notification to a designated recipient within your organization

Delivery options include HTTP/HTTPS, SMTP (e-mail), FTP and VAN

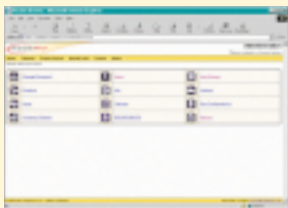

From all reports,

a better way to implement process control.

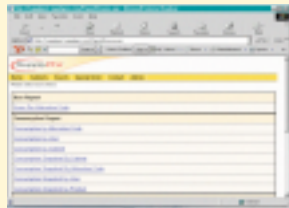

One of SupplyPort's most valuable features is the ability to provide reports to ensure that the right information is always in the right hands, at the right time.

At any time, managers or administrators have full access to each reporting function.

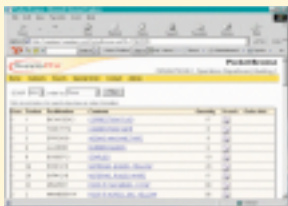

- Customized reports can be sent automatically to your e-mail inbox. This in-depth knowledge gives you, the decision-maker, the ability to control inventory information in real time. And better forecast tomorrow's supply budgets
- Provides real-time information on inventory levels, usage and costs
- Reports on items that have been "checked-out" by employees
- Allows you to create detailed, consumption and inventory reports by job number, work order, etc.

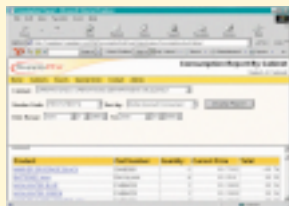

Admin Page
Allows authorized users to configure cabinets, change passwords and add access for new employees.

Report Browse
Access to various types of reports is always within reach for authorized users.

Browse Cabinet
Allows you to browse the contents of any SupplyAgent™ within your system.

Product Consumption Snapshot
Our array of reports encompasses consumption by product and by cabinet. Discrepancy and transaction reports are also available.
